2.1 Task

Launch Internet Explorer using System.setproperty by configuring all the driver under the project.

2.2 Code With Comments

```java
package sample;
import org.openqa.selenium.ie.InternetExplorerDriver;
import org.openqa.selenium.WebDriver;
import org.openqa.selenium.chrome.ChromeDriver;

public class IE {

	public static void main(String[] args)  {

		//Connecting with browser

	//System.setProperty("webdriver.chrome.driver","./Drivers/chromedriver.exe"
);

	System.setProperty("webdriver.ie.driver","./Drivers/IEDriverServer.exe");

		WebDriver driver=new InternetExplorerDriver();

		//Launching google.com
		driver.get("https://www.google.com/");

	//Maximizing the window
		driver.manage().window().maximize();

		//Getting the title of the window and storing it in string and
printing the title as output
		String title = driver.getTitle();
		System.out.println("Title of the page is :"+title);

		///Getting the current url of the window and storing it in string
and printing the url as output
		String currentUrl = driver.getCurrentUrl();
		System.out.println(currentUrl);

//		String pageSource = driver.getPageSource();
//		System.out.println(pageSource);

		String windowHandle = driver.getWindowHandle();
		System.out.println(windowHandle);
	}

}
```

2.3 Explanation of the code.

Launching the internet explorer browser and I set the path in system.set property. Launched google.com and maximized the window. I tried to get the title,current url , page source and windowhandle in output.

2.4 Output

```java
 1 package sample;
 2 import org.openqa.selenium.ie.InternetExplorerDriver;
 3 import org.openqa.selenium.WebDriver;
 4 import org.openqa.selenium.chrome.ChromeDriver;
 5
 6 public class IE {
 7
 8     public static void main(String[] args)  {
 9
10         //Connecting with browser
11         //System.setProperty("webdriver.chrome.driver","./Drivers/chromedriver.exe");
12         System.setProperty("webdriver.ie.driver","./Drivers/IEDriverServer.exe");
13
14         WebDriver driver=new InternetExplorerDriver();
15
16         //Launching google.com
17         driver.get("https://www.google.com/");
18
19         //Maximizing the window
20         driver.manage().window().maximize();
21
22         //Getting the title of the window and storing it in string and printing the title as output
23         String title = driver.getTitle();
24         System.out.println("Title of the page is :"+title);
25
26         ///Getting the current url of the window and storing it in string and printing the url as output
```
